

Perc Drycleaner Operators

Dear Perc Drycleaner Operators :

The Missouri Air Pollution Control Program has worked with the Mid-America Fabricare Association to develop a General Operating Permit for the Perc Drycleaner Industry.

The Air Pollution Control Program believes the enclosed General Operating Permit, Application and Instructions are more concise and straightforward than the previous forms for the basic operating permits.

The following list includes the steps necessary to modify an existing application or submit a new application:

- Submit one copy of a completed general operating permit application;
- If you have previously submitted an operating permit application, do not enclose the filing fee;
- The Air Pollution Control Program will send you a temporary general permit (will be the same as the enclosed general permit with a date stamp) to follow until an official operating permit is issued;
- When the official operating permit is issued, you will receive a dated general operating permit with the effective and expiration dates.

If there are any questions, please feel free to contact the Technical Assistance Program at (800) 361-4827 or the Air Pollution Control Program – Operating Permits Unit at (573) 751-4817. Thank you for your time and attention.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

Roger D. Randolph
